

What happens at midnight?

During Spring One we will be learning about animals including humans. We will find out about different types of animal and whether they are omnivores, carnivores or herbivores.

We will be focussing on nocturnal animals and will learn about owls and other British animals. We will be having a visit from Owl Time where the children will be able to get close to a variety

of different species of owls and will be given the opportunity to hold an owl.

Please keep this visit a secret from your children as we would like it to be a surprise.

We will learn about the human body and the children will be able to find out about their body and recognise their five senses.

At the end of the topic we will be inviting you in to take part in a night time evening. During this event the children will be able to teach you about everything they have learnt. There will also be a special surprise during this evening!

In Art we will learn to use new materials and explore wax resist and model making.

In maths we will be moving on to working with larger numbers and adding and subtracting past 20. We will learn how to add 2 digit numbers and will start to learn to count in 2s, 5s and 10s.

Ways to help at home:

Please continue to read with your child as often as you can. Use your letters and sounds card and practise the sounds given every week in the homework.

Use numbers every day to count, add, subtract and order. Encourage your child to add quantities during shopping trips and at home.
